STONEGATE SUCCESS STORY

Glenda J. was admitted to Stonegate Nursing and Rehab after being hospitalized for respiratory failure and congestive heart failure. Upon evaluation by our therapy team, she required moderate assistance with bed mobility and transfers, and was only able to walk 10 feet using a rolling walker. She also required minimal assistance with grooming and upper body dressing, moderate assistance with toileting and hygiene, and maximum assistance with lower body dressing.

Glenda worked very hard with our physical and occupational therapists, and was able to complete all of her self-care with standby to minimal assistance. She also completed her bed mobility and transfers with contact guard assistance, and was able to walk 150 feet with contact guard assist. She successfully returned home after 38 days of therapy at Stonegate Nursing and Rehab. Great work Glenda!
