STONEGATE SUCCESS STORY

Gregoria P. was admitted to Stonegate Nursing and Rehab following hospitalization for sepsis, pneumonia, and the flu. Prior to her hospitalization, she lived at home with family support. She has a great sense of humor and the sweetest smile.

Upon evaluation by our experienced therapy team, Gregoria required moderate assistance with bed mobility, lower body dressing and bathing; and minimal assistance with transfers, upper body dressing, and toileting. She was able to walk 20 feet with a rolling walker and minimal assistance.

Gregoria participated well in skilled therapy services and made good progress in a short period of time due to her efforts. She was able to successfully return home with family requiring minimal assist with self-care and mobility. **Great work, Gregoria!**
