

STONEGATE SUCCESS STORY

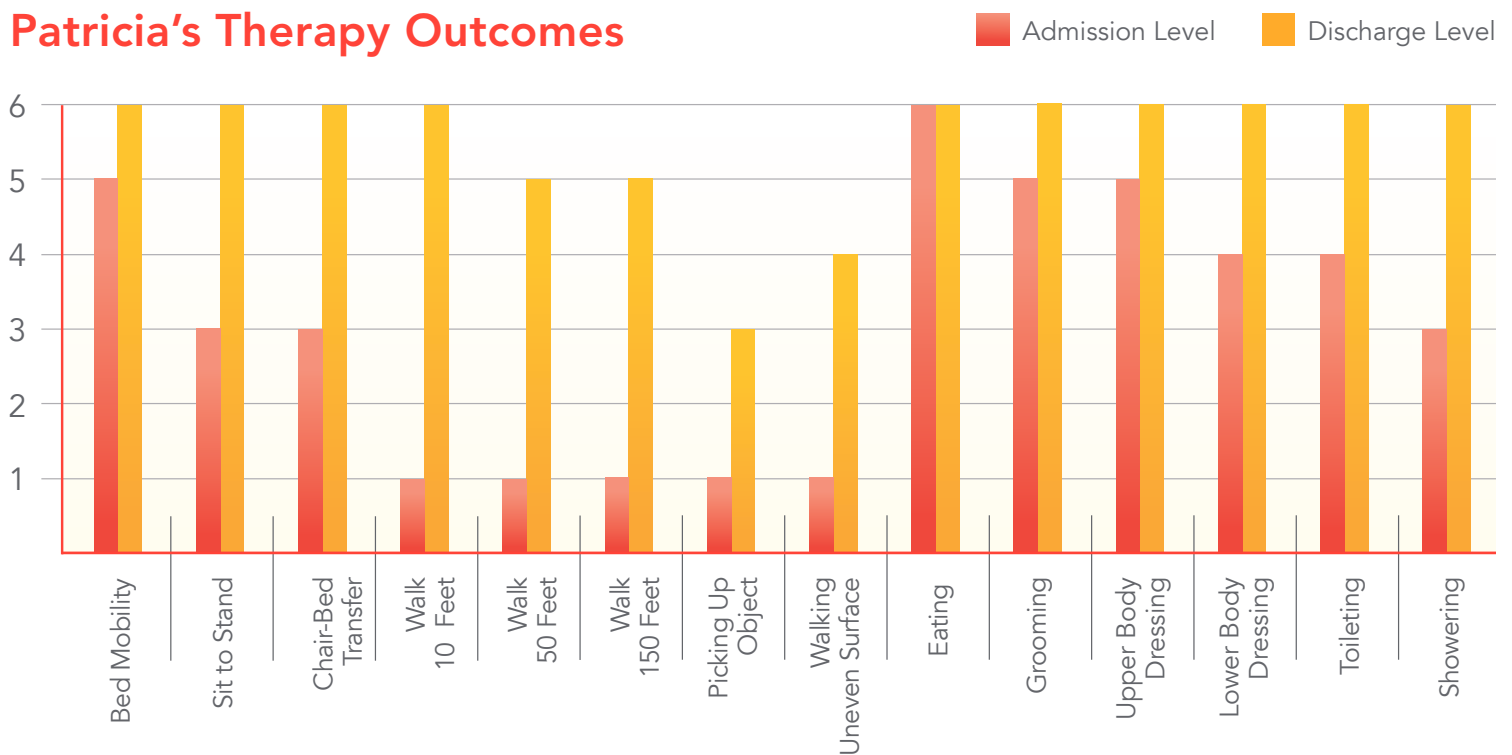

Patricia H. was admitted to Stonegate Nursing and Rehab following a hospital stay after a fall that resulted in a fibula fracture. Prior to this stay, she was independent and lived in a personal care home with a roommate.

Upon evaluation by our experienced therapy team, Patricia required stand-by assistance with bed mobility and upper body dressing, moderate assistance with transfers and bathing, minimal assistance with lower body dressing and toileting, and was unable to ambulate due to non-weightbearing restrictions.

After completing her therapy, Patricia successfully returned to her personal care home! At the time of discharge, she was modified independent with all self-care tasks and mobility using a rolling walker. Her excellent participation and focus on functional improvement led to significant gains that enabled her to return home – way to go Patricia!
