

# STONEGATE SUCCESS STORY

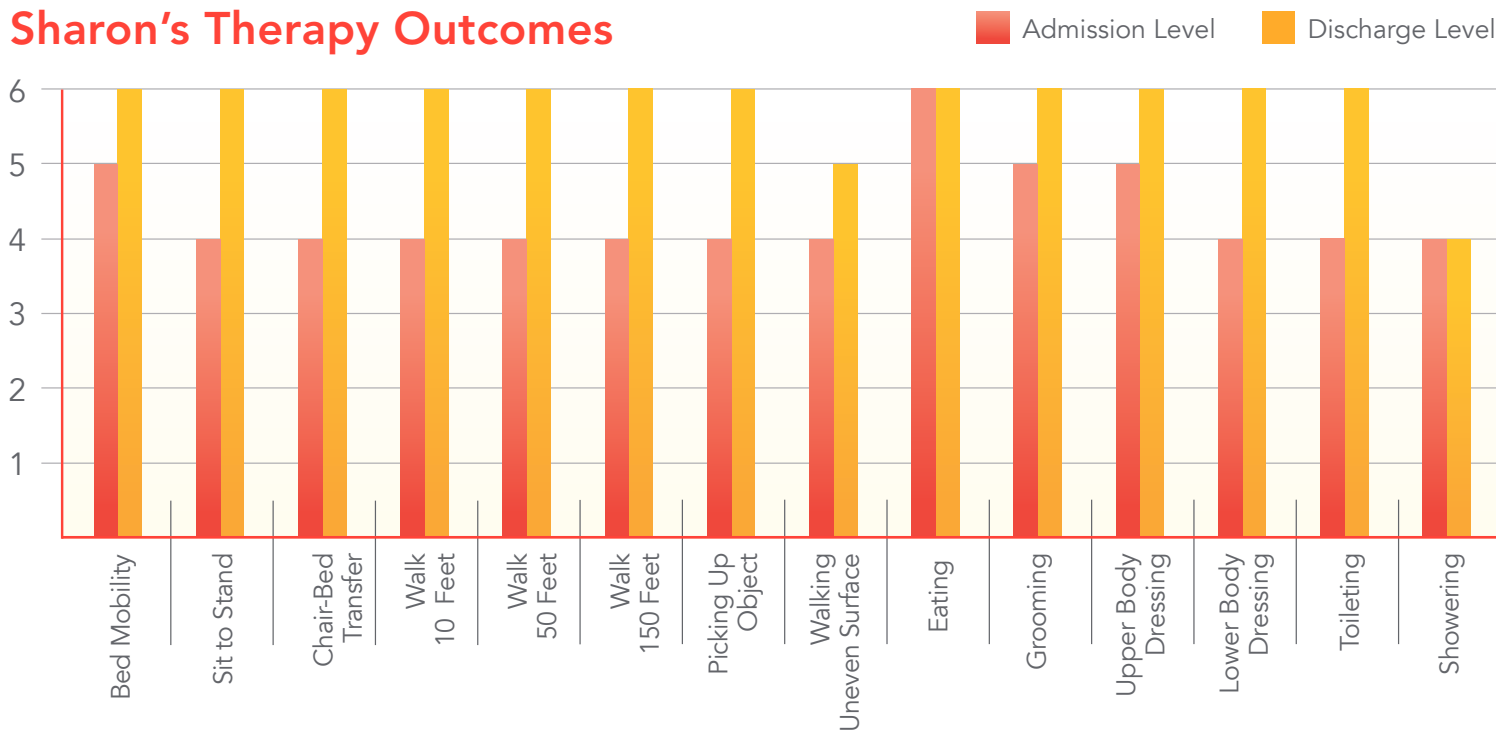

**Sharon C.** was admitted to Stonegate Nursing and Rehab following hospitalization for Covid. She had become very ill and was too weak to return home to her apartment alone. Prior to this stay, she was completely independent with all self-care and mobility without use of an assistive device.

Upon evaluation by our experienced therapy team, Sharon required standby assistance with bed mobility, upper body dressing and grooming; minimal assistance with transfers, lower body dressing, toileting, and bathing; and could walk 25 feet with a walker and contact guard assistance.

Following a short stay with us at Stonegate, Sharon was able to complete all her mobility and self-care tasks independently. Along with participating in skilled therapy, she enjoyed working in our flower room making flower arrangements for herself and others. Her favorite part of therapy was group treatment where she would show off her dancing skills! **Sharon successfully returned home and we wish her all the best! It was a pleasure being a part of your recovery.**
