STONEGATE SUCCESS STORY

Thomas L. was admitted to Stonegate Nursing and Rehab following a hospitalization for sepsis. Prior to this hospitalization, he lived happily at home with his wife. He was evaluated by our therapy team and required maximum assistance with lower body dressing and toileting, and moderate-to-maximum assistance with bed mobility and transfers. He was able to walk 75 feet with a rolling walker and contact guard assistance.

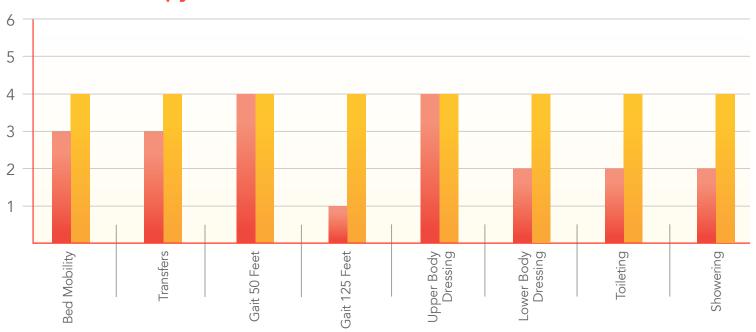

Thomas was able to successfully meet his therapy goals and return home by improving his bed mobility, transfers, and walking 125 feet with contact guard assistance. He could perform lower body dressing, bathing, and toileting with moderate assistance. Way to go, Thomas!
