

OUTCOMES MATTER

PATIENT NAME: Harriet Waring

AGE: 87

ADMITTING HOSPITAL: Texas Health

PRIMARY MEDICAL DX: Fall with hematoma to hip, leg wound

ADMIT DATE: 7/11/24

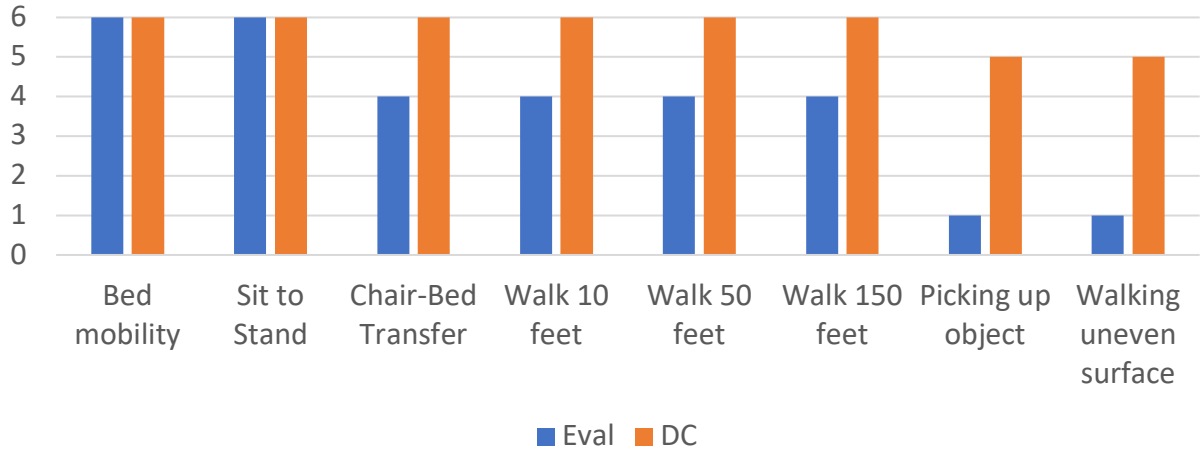

SUCCESSFULLY DISCHARGED FROM THERAPY: 7/27/24

Ms. Waring admitted to Stonegate Nursing and Rehab after having a fall at home resulting in a hospitalization. Ms. Waring, being a retired nurse aesthetician, knew she needed to work on some strength and balance prior to returning home to her ranch. She lived on several acres, had four large dogs, two cats and other animals to attend to.

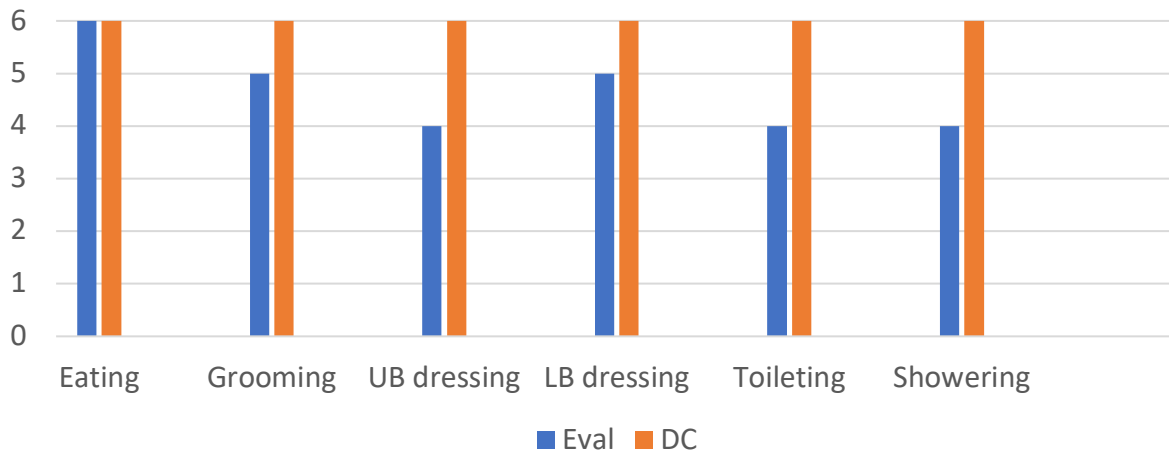

Upon evaluation by physical therapy, she was noted to require minimal assistance with transfers and was able to walk 50 feet with minimal assistance. The occupational therapy evaluation showed she needed standby by assistance with upper body tasks and minimal assistance with lower body dressing, bathing, and toileting.

Since Ms. Waring was at a high-level of function on admission, therapy focused on strengthening, dynamic balance, righting reactions, steps, and item retrieval from low surfaces. She quickly achieved her goals and was able to return home with her roommate! Way to go Ms. Waring!

Physical Therapy

Occupational Therapy

MDS Section GG Functional Scores

06 - Independent

Completes the activity by him/herself with no assistance from a helper

05 - Setup or clean-up assistance

Helper sets up or cleans up; patient completes activity. Helper assists only prior to or following the activity.

04 - Supervision or touching assistance

Helper provides verbal cues and/or touching/steadying and/or contact guard assistance as patient completes activity. Assistance may be provided throughout the activity or intermittently.

03 - Partial/moderate assistance

Helper does LESS THAN HALF the effort. Helper lifts, holds, or supports trunk or limbs but provides less than half the effort.

02 - Substantial/maximal assistance

Helper does MORE THAN HALF the effort. Helper lifts or holds trunk or limbs and provides more than half the effort.

01 - Dependent

Helper does ALL of the effort. Patient does none of the effort to complete the activity. Or the assistance of 2 or more helpers is required for the patient to complete the activity.
